Railing Systems

ABOUT US

KOZZA which is a brand of Kozza Railing Systems Alüminyum Sanayi ve Tic. A.Ş, which has been developing itself in aluminum and metal sectors since 1984 in a more professional way, has recently completed the research and development process under the Kozza brand and has started out with easy and fast assembly to meet the needs of the application companies by producing qualified and original products in the construction sector with glass railing systems.

KOZZA company is active around the globe. Its internal departments have networks of national and international cooperation. Their effectiveness is down to two things: efficient communication and short decision paths. Responsiveness is what enables teams within the company to continually provide inspired solutions and comprehensive support.

Our passion for design is one of the basic principles of our strategy. From hotel projects to shopping malls and almost all living spaces, the special designs used in our systems enable us to easily adapt to the latest trends in contemporary

À PROPOS DE NOUS

KOZZA qui est une marque de Kozza Railing Systems Alüminyum Sanayi ve Tic. A.Ş, se développant dans les secteurs de l'aluminium et du métal depuis 1984 de manière plus professionnelle, a récemment terminé le processus de recherche et développement sous la marque Kozza et a commencé par un assemblage facile et rapide pour répondre aux besoins des entreprises d'installation en produisant des produits qualifiés et originaux dans le secteur de la construction avec des systèmes de garde-corps en verre. La société

KOZZA est active dans le monde entier. Ses services internes disposent de réseaux de coopération nationale et internationale. Leur efficacité tient à deux choses: une communication efficace et des processus de décision courts. La réactivité est ce qui permet aux équipes de l'entreprise de fournir en permanence des solutions inspirées et un support complet. Notre passion pour le design est l'un des principes de base de notre stratégie. De projets hôteliers aux centres commerciaux et à presque tous les espaces de vie, les conceptions spéciales utilisées dans nos systèmes nous permettent de nous adapter facilement aux dernières tendances contemporaines

ÜBER UNS

KOZZA, eine Marke von Kozza Railing Systems Alüminyum Sanayi ve Tic. A.Ş, das sich seit 1984 professioneller in der Aluminium- und Metallbranche entwickelt, hat kürzlich den Forschungs- und Entwicklungsprozess unter der Marke Kozza abgeschlossen und mit einer einfachen und schnellen Montage begonnen, um den Anforderungen der Anwendung gerecht zu werden Unternehmen durch die Herstellung qualifizierter und origineller Produkte im Bausektor mit Glasgeländersystemen.

Das Unternehmen KOZZA ist weltweit aktiv. Die internen Abteilungen verfügen über Netzwerke nationaler und internationaler Zusammenarbeit. Ihre Effektivität beruht auf zwei Dingen: effizienter Kommunikation und kurzen Entscheidungswegen. Reaktionsfähigkeit ermöglicht es den Teams im Unternehmen, kontinuierlich inspirierte Lösungen und umfassenden Support bereitzustellen.

Description of Rail Tests

The object of the test is to verify the behaviour of the balustrade under:

Static Loads:

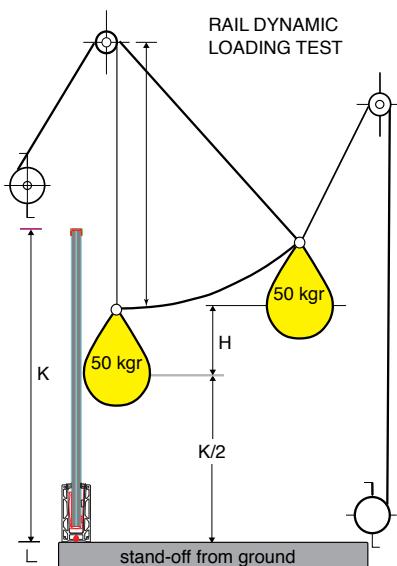

Horizontal outwardly directed static service and safety loads (linearly distributed and point horizontal loads). The load is applied at the top of the handrail for a while according to standards, then deformation is measured from the reference point. The deformation value is checked according to standards.

Dynamic Loads:

It is the impact test using a suspended soft body of 50 kgf, comprising an Aluminium solid profile, along with two tyres, or another bag full of small Aluminium spheres, always totalling Weight/Poids of 50 kgf as soft body load. Impact points on glass panel are shown on following photos.

Drop Height (H), for soft body mass

$$50 \text{ Kgf} = 0.5 \text{ Kn}$$

$$300 \text{ mm} = 0.30 \text{ m} \rightarrow \text{Housing/Residential Category}$$

$$450 \text{ mm} = 0.45 \text{ m} \rightarrow \text{Offices/Commercial Category}$$

$$700 \text{ mm} = 0.70 \text{ m} \rightarrow \text{Public/Mall Category}$$

$$900 \text{ mm} = 0.90 \text{ m} \rightarrow \text{Public/Mall Category}$$

$$\text{Maximum Permissible Horizontal Deflection} = K/300,$$

$$\text{Maximum Rail Height} = K = 1200 \text{ mm}$$

$$\text{Using, Maximum Permissible Horizontal Deflection} = 4 \text{ mm} = 0.004 \text{ m};$$

During impact test, no falling glass fragments may become detached that could cause personal injury, and also the filling element of the rail must not separate from the structure of balustrade, and the glass

continue to exercise its function under the application of a punctual load of $200 \text{ N} = 20 \text{ kgf}$ for 30 seconds. The impact body must not pass through the balustrade upon impact.

Category for Impact Test Certification	Drop Height (m)	Impact Velocity (m/sec) SQRT (2gH)	Impact Load (Kgr) caused by soft body 50 Kgr= 0.5 Kn onto the Glass Panel	Impact Time (ms)	Impact Dynamic Energy (Joules=Nm) 0.5 Kn x Drop Height = mgH
Housing, Residential	0.30	2.43	3690	1.6	150
Office, Commercial	0.45	3.00	5625	1.3	225
Public, Mall	0.70	3.70	8556	1.0	350
Public, Mall	0.90	4.20	11025	0.96	450

Rail Test Categories:

Housing / Residential use – 0.5 Kn (0.5 Kn/m);

Relatively light constructions can be used for applications in homes. The glass balustrade must be able to withstand 0.5 kN per linear meter.

Office Function – 1 Kn (1 Kn/m);

Glass balustrades in offices require the use of heavier materials. The glass must be thicker and the profiles must obviously be adapted accordingly. The glass balustrade must be able to withstand 1 KN per linear meter.

Public Function – Stadiums – 1.5 KN – 3 KN (3KN/m);

Public spaces and stadiums, where lot of people may assemble in small space, require robust balustrades. Glass thickness and heavy profiles provide safety under heavy loads. The glass balustrade must be able to withstand up to 3 KN per linear meter.

EN

KOZZA is adapting rapidly developing technology with creating innovations. We have developed the Glassmove mechanism with technically accurate and optimum properties. Glassmove can eliminate the visual concerns created by vertical bearing profiles commonly used in classical aluminum railings.

The Glassmove mechanism, which is a mechanism that can be economically and significantly eliminates the serious problems of conventional fixed mounting systems. It facilitates the stabilization of the glass panel by making it quick, easy and safe to ensure that the glass is stabilized at 90 ° even on the most uneven floors, giving the glass mobility.

It is designed to use glasses between 12-21,52 mm

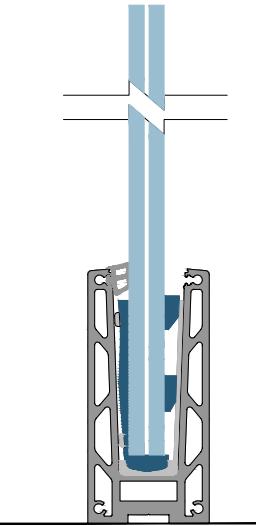

FR

KOZZA adapte rapidement la technologie en développement en créant des innovations. Nous avons développé le mécanisme Glassmove avec des propriétés techniquement précises et optimales. Glassmove peut éliminer les problèmes visuels créés par les profils porteurs verticaux couramment utilisés dans les garde-corps classiques en aluminium.

Le mécanisme Glassmove est un mécanisme qui peut éliminer économiquement et de manière significative les graves problèmes des systèmes de montage fixes conventionnels. Il facilite la stabilisation du panneau de verre en la rendant rapide, facile et sûre pour s'assurer que le verre soit stabilisé à 90 ° même sur les sols les plus inégaux, fournissant ainsi la mobilité au verre.

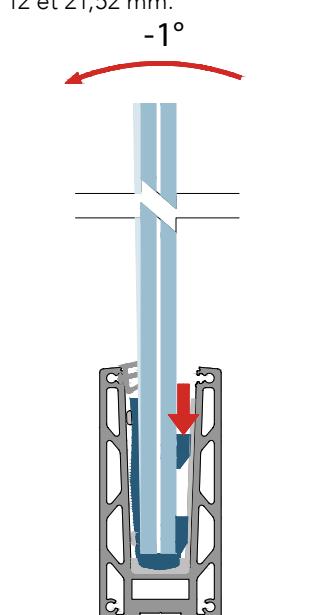

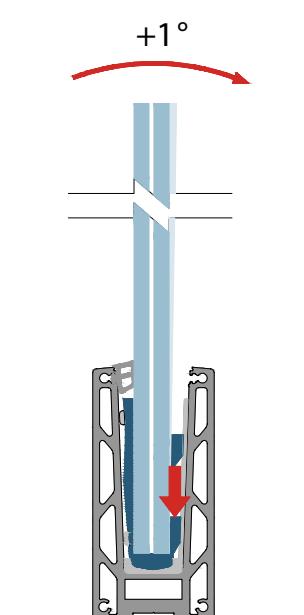

Il est conçu pour utilisation des verres entre 12 et 21,52 mm.

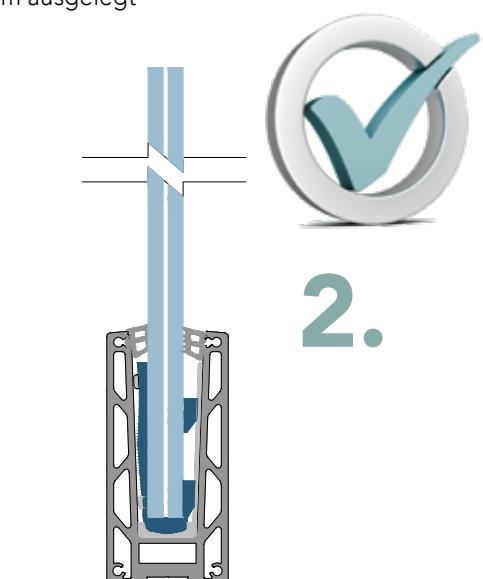

DE

KOZZA passt die sich schnell entwickelnde Technologie an und schafft Innovationen. Wir haben den Glassmove-Mechanismus mit technisch genauen und optimalen Eigenschaften entwickelt. Glassmove kann die visuellen Probleme beseitigen, die durch vertikale Lagerprofile entstehen, die üblicherweise in klassischen Aluminiumgeländern verwendet werden.

Der Glassmove-Mechanismus ist ein Mechanismus, der wirtschaftlich ist und die schwerwiegenden Probleme herkömmlicher fester Montagesysteme erheblich beseitigt. Es erleichtert die Stabilisierung der Glasscheibe, indem es schnell, einfach und sicher macht, dass das Glas auch auf unebenen Böden bei 90 ° stabilisiert wird, wodurch die Glasbeweglichkeit gewährleistet wird.

Es ist für Brillen zwischen 12 und 21,52 mm ausgelegt

EN: KE 105 series, which is the upper mounting model has been designed in a way to meet the anticipation in the site.

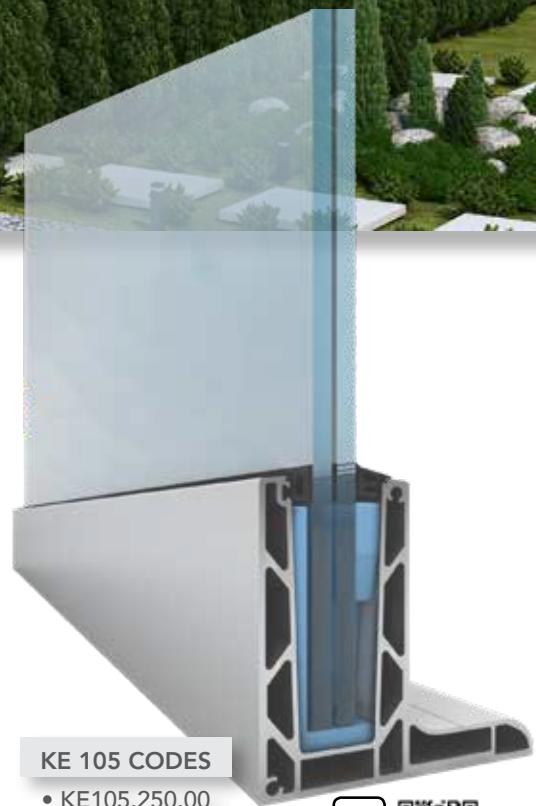

The KE 105 series was developed and structured in line with the recommendation and demands of architectures in the application field, it may be used in larger projects such as shopping malls and hotels. The thickness of the glass may be selected optionally between 12-21.52 millimeters.

FR: La série KE 105, qui est le modèle de montage supérieur, a été conçue de manière à répondre aux besoins du chantier.

La série KE 105 a été développée et structurée conformément aux recommandations et aux exigences des architectures dans le domaine, elle peut être utilisée dans des grands projets tels que les centres commerciaux et les hôtels. L'épaisseur du verre peut être choisie en option entre 12-21,52 millimètres.

DE: Die KE 105-Serie, bei der es sich um das obere Montagemodell handelt, wurde so konzipiert, dass die Erwartungen vor Ort erfüllt werden.

Die KE 105-Serie wurde gemäß den Empfehlungen und Anforderungen von Architekturen im Anwendungsbereich entwickelt und strukturiert und kann in größeren Projekten wie Einkaufszentren und Hotels eingesetzt werden.

KE 155

EN: KE 155 series, which is the upper mounting model has been designed in a way to meet the anticipation in the site.

The KE 155 series was developed and structured in line with the recommendation and demands of architectures in the application field, it may be used in larger projects such as shopping malls and hotels. The thickness of the glass may be selected optionally between 8-13.52 millimeters.

FR: La série KE 155, qui est le modèle de montage supérieur, a été conçue de manière à répondre aux besoins du chantier.

La série KE 155 a été développée et structurée conformément aux recommandations et aux exigences des architectures dans le domaine, elle peut être utilisée dans des grands projets tels que les centres commerciaux et les hôtels. L'épaisseur du verre peut être choisie en option entre 8-13.52 millimètres.

DE: Die KE 155-Serie, bei der es sich um das obere Montagemodell handelt, wurde so konzipiert, dass die Erwartungen vor Ort erfüllt werden.

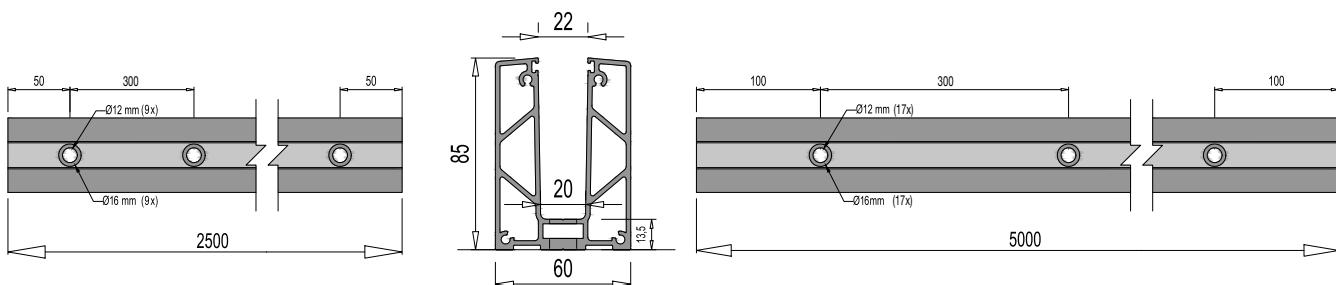

Die KE 155-Serie wurde gemäß den Empfehlungen und Anforderungen von Architekturen im Anwendungsbereich entwickelt und strukturiert und kann in größeren Projekten wie Einkaufszentren und Hotels eingesetzt werden.

KF SERIES GLASS RAILING SYSTEMS

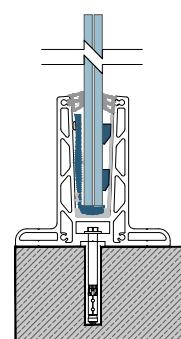

KF 1000

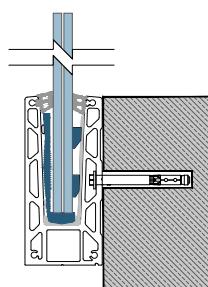

KF 1050

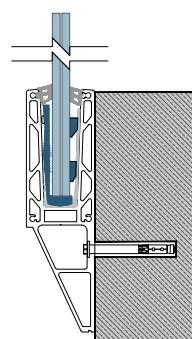

KF 1100

KF 1150

KF 1200

EN: KF series is designed in a way that is suitable for all kinds of mounting situations. Upper mounting is provided with the codes of (KF 1000-1050-1100-1250-1400-1450) and side mounting is provided in the codes of (KF 1150-1200-1350). Covers, complementary parts, and other various accessories are used to make the mounting more convenient. Since the profiles are provided as a whole, in addition to their sturdiness and reliability, they could be applied in any residential areas (such as hotels, shopping malls, public projects, private villas, and homes).

Glass Railing System Profiles are shipped in the sizes of 2,5 and 5 mt without the need of a cover, and in a manner ready to be assembled.

FR: La série KF est conçue de manière à convenir à toutes sortes de situations de montage. Le montage supérieur est fourni sous les codes KF 1000-1050-1100-1250-1400-1450 et le montage latéral est fourni sous les codes KF 1150-1200-1350. Des revêtements, des pièces complémentaires et d'autres accessoires divers sont utilisés pour rendre le montage plus pratique. Étant donné que les profils sont fournis dans leur ensemble, en plus de leur robustesse et de leur fiabilité, ils peuvent être utilisés dans toutes les zones résidentielles (telles que les hôtels, les centres commerciaux, les projets publics, les villas privées et les maisons).

Les profilés de système de garde-corps en verre sont expédiés dans les tailles de 2,5 et 5 mt sans la nécessité d'une couverture, et d'une manière prête à être assemblée.

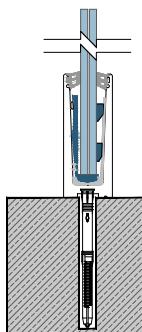

DE: Die KF-Serie ist so konzipiert, dass sie für alle Arten von Montagesituationen geeignet ist. Die obere Montage ist mit den Codes (KF 1000-1050-1100-1250-1400-1450) und die seitliche Montage mit den Codes (KF 1150-1200-1350) versehen. Abdeckungen, ergänzende Teile und anderes verschiedenes Zubehör werden verwendet, um die Montage bequemer zu machen. Da die Profile als Ganzes bereitgestellt werden, können sie zusätzlich zu ihrer Robustheit und Zuverlässigkeit in allen Wohngebieten (wie Hotels, Einkaufszentren, öffentlichen Projekten, privaten Villen und Wohnungen) angewendet werden.

Glasgeländersystemprofile werden in den Größen 2,5 und 5 m ohne Abdeckung und montagefertig geliefert.

KT SERIES GLASS RAILING SYSTEMS

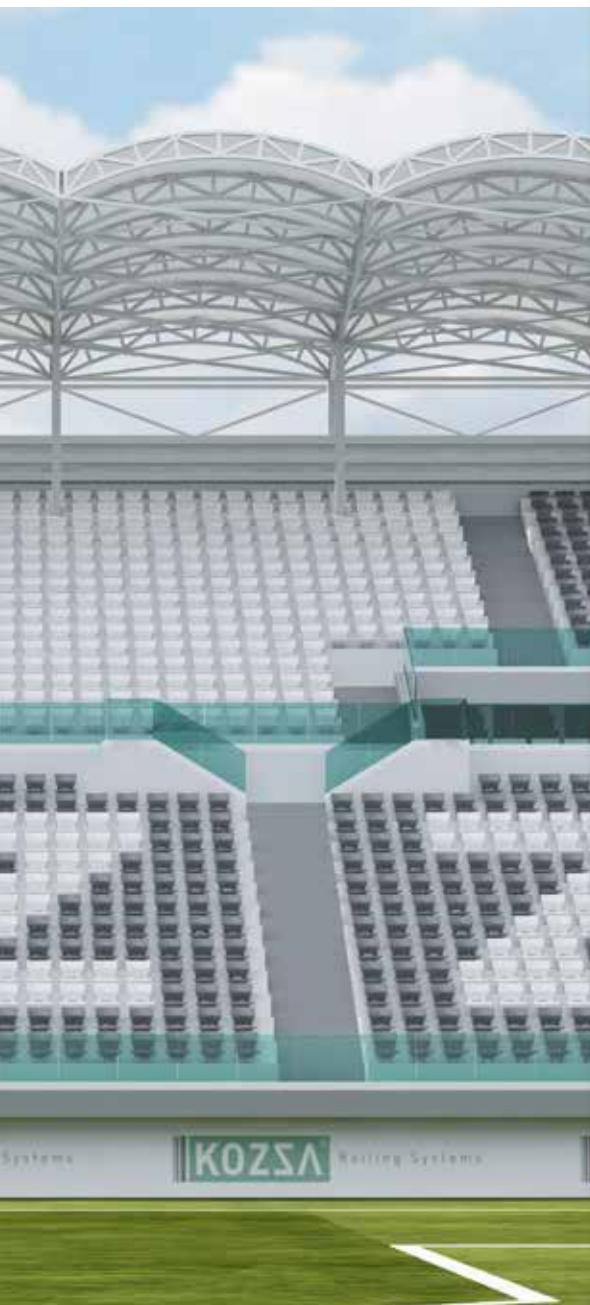

KT 10000

KT 10500

KT 11500

KT 12000

EN: KT series is designed in a way that is suitable for all kinds of mounting situations. Upper mounting is provided with the codes of (KT 10000-10500) and side mounting is provided with the codes of (KT 11500-12000). Covers, complementary parts, and other various accessories are used to make the mounting more convenient. These profiles are made with the aim of heavy load tolerance. So it is the best choice for crowded spaces such as stadiums and airport/bus terminals.

Glass Railing System Profiles are shipped in the sizes of 2,5 and 5 mt without the need of a cover, and in a manner ready to be assembled.

FR: La série KT est conçue de manière à convenir à toutes sortes de situations de montage. Le montage supérieur est fourni sous les codes (KT 10000-10500) et le montage latéral est fourni sous les codes (KT 11500-12000). Des revêtements, des pièces complémentaires et d'autres accessoires divers sont utilisés pour rendre le montage plus pratique. C'est donc le meilleur choix pour les espaces encombrés tels que les stades et les aéroports/terminaux de bus.

Les profilés de système de garde-corps en verre sont expédiés dans les tailles de 2,5 et 5 mt sans la nécessité d'une couverture, et d'une manière prête à être assemblée.

DE: Die KT-Serie ist so konzipiert, dass sie für alle Arten von Montagesituationen geeignet ist. Die obere Montage ist mit den Codes (KT 10000-10500) und die seitliche Montage mit den Codes (KT 11500-12000) versehen. Abdeckungen, ergänzende Teile und anderes verschiedenes Zubehör werden verwendet, um die Montage bequemer zu machen. Diese Profile sind hergestellt mit dem Ziel der Schwerlast Toleranz. Daher ist es die best Wahl für überfüllte Räume wie Stadien und Flughafen/Busterminals.

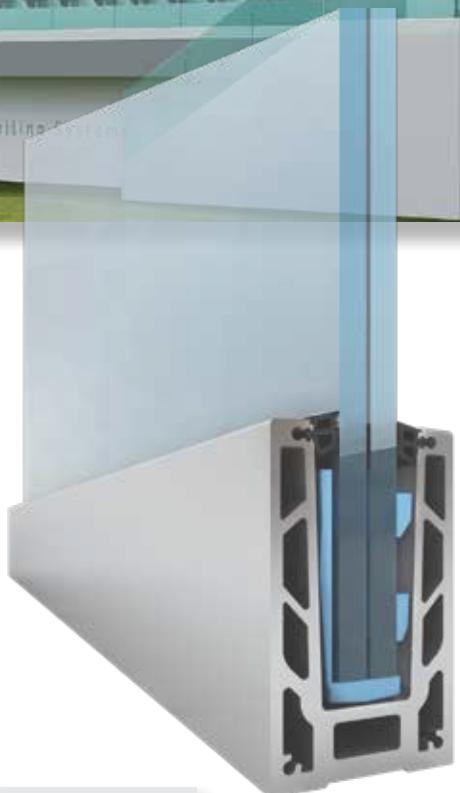

Glasgeländersystemprofile werden in den Größen 2,5 und 5 m ohne Abdeckung und montagefertig geliefert.

GLASS RAILING SYSTEMS

KP 2000

KP 2050

KP 2100

KP 2150

KP 2200

EN: KP series is designed in a way that is suitable for all kinds of mounting situations. They are shipped in the sizes of 15 cm and 30 cm needs to be covered, and in a way which the anchoring holes are already opened, and in a manner ready to be assembled. Since the profiles are designed in pieces, more economical than all profiles. Upper mounting is provided with the codes of (KP 2000-2050-2100-2300-2350-2400-2450) and side mounting is provided in the codes of (KP 2150-2200). They could be applied in any sort of residential area (such as hotels, shopping malls, public projects, private villas, and homes).

FR: La série KP est conçue d'une manière qui convient à toutes sortes de situations de montage. Ils sont expédiés dans les tailles de 15 cm et 30 cm doivent être couverts, et d'une manière dont les trous d'ancrage sont déjà ouverts, et d'une manière prête à être assemblée. Étant donné que les profils sont conçus en pièces, ils sont plus économiques que tous les profils. Le montage supérieur est fourni sous les codes KP 2000-2050-2100-2300-2350-2400-2450 et le montage latéral est fourni sous les codes KP 2150-2200. Ils pourraient être appliqués dans tout type de zone résidentielle (tels que les hôtels, les centres commerciaux, les projets publics, les villas privées et les maisons).

DE: Die KP-Serie ist so konzipiert, dass sie für alle Arten von Montagesituationen geeignet ist. Sie werden in den Größen 15 cm und 30 cm versandt und müssen abgedeckt und so montiert werden, dass die Verankerungslöcher bereits geöffnet sind und montagefertig sind. Da die Profile in Teilen ausgeführt sind, ist dies wirtschaftlicher als alle Profile. Die obere Montage ist mit den Codes (KP 2000-2050-2100-2300-2350-2400-2450) und die seitliche Montage mit den Codes (KP 2150-2200) versehen. Sie können in jeder Art von Wohngebiet angewendet werden (z. B. in Hotels, Einkaufszentren, öffentlichen Projekten, privaten Villen und Wohnungen).

KH SERIES GLASS ADAPTERS

KH 3000

KH 3050

KH 3100

KH 3150

EN: KH series designed for use in 12-21.52 mm glasses ranges and are shipped to our customer in a way in which the anchoring holes are already opened and in a manner ready to be assembled. Glass adapters is provided with the codes of KH 3000-3050-3100-3150-3200-3250-3300-3350.

In KH series glass adapters optionally, the top profile can be used as a handrail. All adapters are designed in a way that is suitable for all kinds of mounting situations. KH series glass adapters could be applied in any sort of residential areas (such as hotels, shopping malls, public projects, private villas, and homes).

FR: La série KH est conçue pour être utilisée dans les gammes de verres de 12 à 21,52 mm et est expédiée à nos clients de manière à ce que les trous d'ancre soient déjà ouverts et prêts à être assemblés. Les adaptateurs pour verre sont fournis sous les codes KH 3000-3050-3100-3150-3200-3250-3300-3350.

Dans les adaptateurs pour verre de la série KH, le profil supérieur peut être utilisé en option comme main courante. Tous les adaptateurs sont conçus de manière à convenir à toutes sortes de situations de montage. Les adaptateurs de verre de la série KH peuvent être installés dans tout type de zones résidentielles (tels que les hôtels, les centres commerciaux, les projets publics, les villas privées et les maisons).

DE: Die KH-Serie wurde für den Einsatz in 12-21,52-mm-Brillen entwickelt und wird so an unseren Kunden geliefert, dass die Verankerungslöcher bereits geöffnet und montagefertig sind. Glasadapter werden mit den Codes KH 3000-3050-3100-3150-3200-3250-3300-3350 geliefert.

Bei Glasadapters der KH-Serie kann das obere Profil optional als Handlauf verwendet werden. Alle Adapter sind so konstruiert, dass sie für alle Arten von Montagesituationen geeignet sind. Glasadapter der KH-Serie können in allen Wohngebieten eingesetzt werden (z. B. in Hotels, Einkaufszentren, öffentlichen Projekten, privaten Villen und Wohnungen).

Les profils du système de balcon à la française sont fournis sous les codes KB 5000-5050 5100.

La série KB de balcon à la française est conçue de manière à convenir à toutes sortes de situations de montage. Étant donné que les profils sont fournis dans leur ensemble, en plus de leur robustesse et de leur fiabilité, ils pourraient être appliqués dans n'importe quel type de zone résidentielle (tels que les hôtels, les centres commerciaux, les projets publics, les villas privées et les maisons).

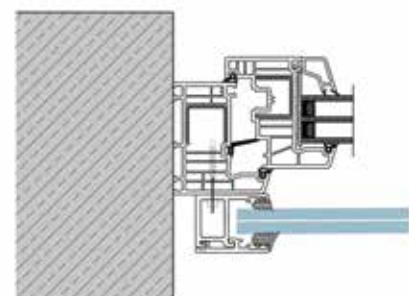

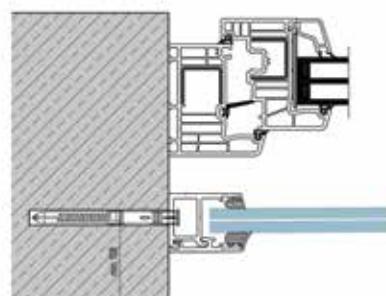

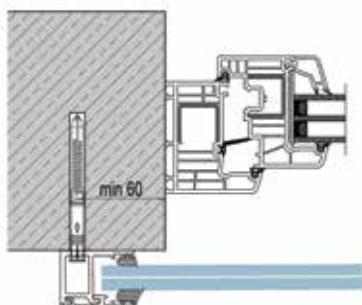

DE: Französische Balkonsystemprofile werden als Ganzes in den Größen von 5 m mit der Notwendigkeit einer Abdeckung und auf eine Weise geliefert, dass die Verankerungslöcher bereits geöffnet sind und bereit zum Zusammenbau sind. Französische Balkonsystemprofile werden mit den Codes (KB 5000-5050 5100) geliefert.

Die KB French Balcony Series ist so konzipiert, dass sie für alle Arten von Montagesituationen geeignet ist. Da die Profile als Ganzes bereitgestellt werden, können sie zusätzlich zu ihrer Robustheit und Zuverlässigkeit in jeder Art von Wohngebiet (wie Hotels, Einkaufszentren, öffentlichen Projekten, privaten Villen und Häusern) angewendet werden.

KB 5000 French Balcony Systems

EN: French Balcony System Profiles are shipped as a whole to the customers in the size of 5 mt with the need of a cover, and in a way which the mounting holes are already opened, and in a manner ready to be assembled. Since the profiles are designed as a whole, time is saved.

French Balcony System Profiles is provided with the codes of (KB 5000-5050-5100)

Profile series may be manufactured as a single piece and as a whole for any mill finish, bright anodized, matte anodized, satin anodized, and for any RAL coded colors.

FR: Les profilés du système de balcon à la française sont expédiés aux clients de façon couverte dans leur ensemble dans la taille de 5 mt, et d'une manière dont les trous de montage sont déjà ouverts, et d'une manière prêts à être assemblés. Puisque les profils sont conçus dans leur ensemble, cela fait gagner du temps. Les profils du système de balcon à la française sont fournis sous les codes KB 5000-5050-5100. La série de profilés peut être fabriquée en une seule pièce et dans son ensemble dans toute finition comme texture métallique, anodisé brillant, anodisé mat, anodisé satiné et dans toutes les couleurs codées RAL.

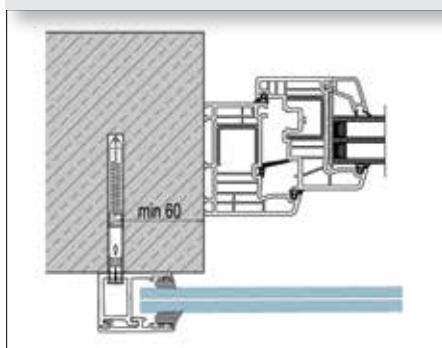

DE: Französische Balkonsystemprofile werden als Ganzes in einer Größe von 5 m an die Kunden geliefert, wobei eine Abdeckung erforderlich ist und die Befestigungslöcher bereits geöffnet und montagefertig sind. Da die Profile als Ganzes entworfen werden, wird Zeit gespart.

Französische Balkonsystemprofile werden mit den Codes (KB 5000-5050-5100) geliefert.

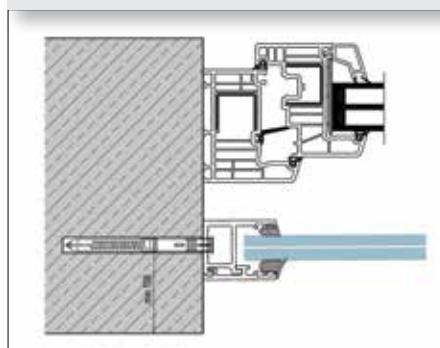

Die Profilserie kann als Einzelstück und als Ganzes für jedes Mühlenfinish, hell eloxiert, matt eloxiert, satiniert und für alle RAL-codierten Farben hergestellt werden.

KC SERIES CANOPY SYSTEMS

Available on www.kozzarailing.com and our mobile applications and social media accounts

EN: The CANOPY Systems Profile is designed for use in 12-21.52 mm glasses ranges and is shipped with or without cover in a way in which the anchoring holes are already opened and in a manner ready to be assembled.

CANOPY Systems are provided with the codes of KC 6000. KC series may be manufactured with or without cover. In KC series CANOPY Systems optionally, the top profile can be used also. KC series CANOPY Systems could be applied in any sort of residential areas (such as hotels, shopping malls, public projects, private villas, and homes).

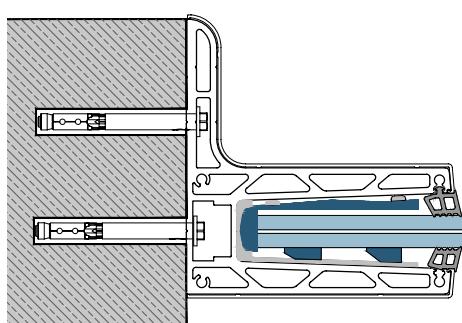

FR: Les profils du système d'AUVENT sont conçus pour être utilisés dans les gammes de verres de 12 à 21,52 mm et sont expédiés avec ou sans couverture et de manière à ce que les trous d'ancrage soient déjà ouverts et prêts à être assemblés.

Les systèmes d'AUVENT sont fournis sous le code KC 6000. La série KC peut être fabriquée avec ou sans couverture. Dans les systèmes AUVENT de la série KC, le profil supérieur peut également être utilisé en option. Les systèmes d'AUVENT de la série KC peuvent être appliqués dans tout type de zones résidentielles (tels que les hôtels, les centres commerciaux, les projets publics, les villas privées et les maisons).

DE: Das CANOPY-Systemprofil ist für den Einsatz in Brillenbereichen von 12 bis 21,52 mm ausgelegt und wird mit oder ohne Abdeckung so geliefert, dass die Verankerungslöcher bereits geöffnet sind und montagefertig sind.

CANOPY-Systeme sind mit den Codes KC 6000 ausgestattet. Die KC-Serie kann mit oder ohne Abdeckung hergestellt werden. Optional kann bei CANOPY-Systemen der KC-Serie auch das Top-Profil verwendet werden. CANOPY-Systeme der KC-Serie können in allen Wohngebieten eingesetzt werden (z. B. in Hotels, Einkaufszentren, öffentlichen Projekten, privaten Villen und Wohnungen).

KC 6000

KC 6000

EN: KC 6000 series brings under the spotlight the simplicity and transparency of the glass, and it has been designed in a way to meet the needs of the site. The Glassmove® mechanism, which provides flexibility for the glass is available in the KC 6000 series used in larger projects such as private houses and hotels.

The thickness of the glass may be selected optionally between 12 - 21.52 millimeters.

FR: La série KC 6000 met à l'honneur la simplicité et la transparence du verre, et elle a été conçue de manière à répondre aux besoins du site. Le mécanisme Glassmove®, qui offre de la flexibilité pour le verre, est disponible dans la série KC 6000 utilisée dans les grands projets tels que les maisons privées et les hôtels.

L'épaisseur du verre peut être choisie en option entre 12 et 21,52 millimètres.

DE: Die KC 6000-Serie rückt die Einfachheit und Transparenz des Glases ins Rampenlicht und wurde so konzipiert, dass sie den Anforderungen des Standorts entspricht. Der Glassmove®-Mechanismus, der dem Glas Flexibilität bietet, ist in der KC 6000-Serie erhältlich, die in größeren Projekten wie Privathäusern und Hotels eingesetzt wird.

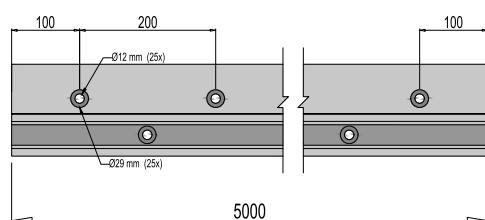

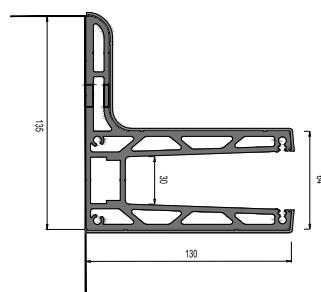

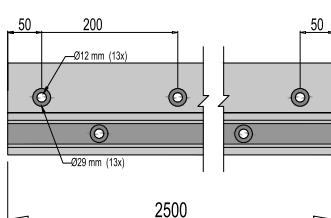

Die Dicke des Glases kann wahlweise zwischen 12 und 21,52 Millimetern gewählt werden.

KR SERIES

ALUMINUM RAILINGS

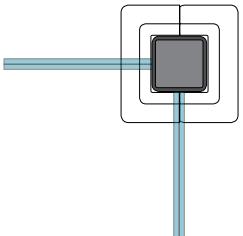

KR 7000

KR 7100

KR 7200

EN: KR series is economic and accessible for everybody. With an optimal DESIGN-QUALITY-PRICE balance KR profiles are shipped in the size of 1 mt but need to be covered. The profile's mounting anchoring holes are opened and in a manner ready to be assembled. Top mounting is provided with the codes of (KR 7000 - KR 7100 - KR 7200) and side mounting is provided in the codes of (KR 7300 - KR 7400 - KR 7500 - KR 7600).

The KR series has an easy installation method and with suitable designs for projects involving residential, commercial, and single houses, etc.

FR: La série KR est économique et accessible à tous. Avec une optimale Équilibre le design-QUALITÉ-PRIX Les profils KR sont expédiés dans la taille de 1 mt mais doivent être couverts. Trous d'ancrage de montage du profilé sont ouverts et prêts à être assemblés. Le montage supérieur est fourni avec les codes de (KR 7000 - KR 7100 - KR 7200) et côté le montage est prévu dans les codes de (KR 7300 - KR 7400 - KR 7500 - KR 7600).

La série KR a une méthode d'installation facile et avec des conceptions appropriées pour les projets impliquant des maisons résidentielles, commerciales et individuelles, etc.

DE: Die KR-Serie ist wirtschaftlich und für jedermann zugänglich. Mit optimal DESIGN-QUALITÄT-PREIS Balance KR-Profile werden in der Größe von versendet 1 mt, müssen aber abgedeckt werden. Die Montageverankerungslöcher des Profils sind geöffnet und montagefertig. Top-Montage ist versehen mit den Codes (KR 7000 - KR 7100 - KR 7200) und Seite Montage ist in den Codes vorgesehen (KR 7300 - KR 7400 - KR 7500 - KR 7600).

Die KR-Serie verfügt über eine einfache Installationsmethode und mit geeigneten Designs für Projekte mit Wohn-, Gewerbe- und Einfamilienhäusern usw.

KR 7000

EN: The type I (top) KR series was developed and structured in line with the recommendation and demands of architectures in the application field. This type of railings is very popular and can be adapted for many requirements. It may be used in many projects such as villas, open area of coffee shops, and a wide range of residential projects.

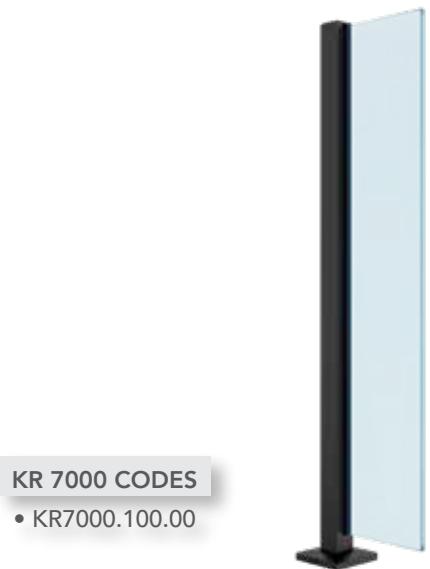

The only thickness of the glass that can be used with KR 7000 is 8.72 mm.

FR: La série KR de type I (haut) a été développée et structurée conformément aux recommandations et aux exigences des architectures dans le domaine d'application. Ce type de garde-corps est très populaire et peut être adapté à de nombreuses exigences. Il peut être utilisé dans de nombreux projets tels que des villas, des espaces ouverts de cafés et un large éventail de projets résidentiels.

La seule épaisseur de verre pouvant être utilisée avec KR 7000 est de 8,72 mm.

DE: Die Typ I (oben) KR-Serie wurde gemäß den Empfehlungen und Anforderungen von Architekturen im Anwendungsbereich entwickelt und strukturiert. Diese Art von Geländer ist sehr beliebt und kann für viele Anforderungen angepasst werden. Es kann in vielen Projekten wie Villen, Freiflächen von Cafés und einer Vielzahl von Wohnprojekten verwendet werden.

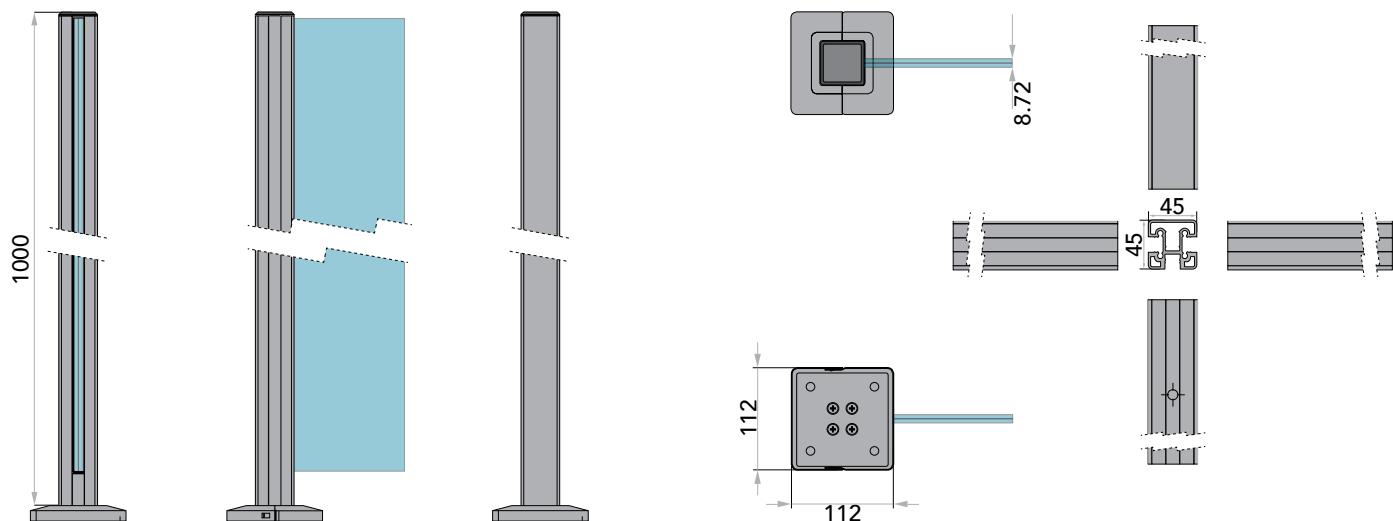

Die einzige Glasdicke, die mit KR 7000 verwendet werden kann, beträgt 8,72 mm.

Glass Properties

CALCULATION OF WEIGHT

Formula : $H \text{ (m)} \times W \text{ (m)} \times 2.5 \times T \text{ (mm)} = \text{KG}$

Example: $H: 1 \text{ m} \quad W: 2.5 \text{ m} \quad T: 16 \text{ mm}$
 $1 \times 1 \times 2.5 \times 16 = 40 \text{ KG}$

$$8 - 9,52 \text{ mm} = 4 + 4 (0,38 - 1,52) / 4,4 (1 - 4)$$

CODE	W	WEIGHT (kg)
9900.500.00	500	10
9900.600.00	600	12
9900.700.00	700	14
9900.800.00	800	16
9900.900.00	900	18
9900.1000.00	1000	20
9900.1100.00	1100	22
9900.1200.00	1200	24
9900.1300.00	1300	26

$$10 - 11,52 \text{ mm} = 5 + 5 (0,38 - 1,52) / 5,5 (1 - 4)$$

CODE	W	WEIGHT (kg)
9910.500.00	500	12,5
9910.600.00	600	15
9910.700.00	700	17,5
9910.800.00	800	20
9910.900.00	900	22,5
9910.1000.00	1000	25
9910.1100.00	1100	27,5
9910.1200.00	1200	30
9910.1300.00	1300	32,5

$$12 - 13,52 \text{ mm} = 6 + 6 (0,38 - 1,52) / 6,6 (1 - 4)$$

CODE	W	WEIGHT (kg)
9920.500.00	500	15
9920.600.00	600	18
9920.700.00	700	21
9920.800.00	800	24
9920.900.00	900	27
9920.1000.00	1000	30
9920.1100.00	1100	33
9920.1200.00	1200	36
9920.1300.00	1300	39

$$16 - 17,52 \text{ mm} = 8 + 8 (0,38 - 1,52) / 8,8 (1 - 4)$$

CODE	W	WEIGHT (kg)
9930.500.00	500	20
9930.600.00	600	24
9930.700.00	700	28
9930.800.00	800	32
9930.900.00	900	36
9930.1000.00	1000	40
9930.1100.00	1100	44
9930.1200.00	1200	48
9930.1300.00	1300	52

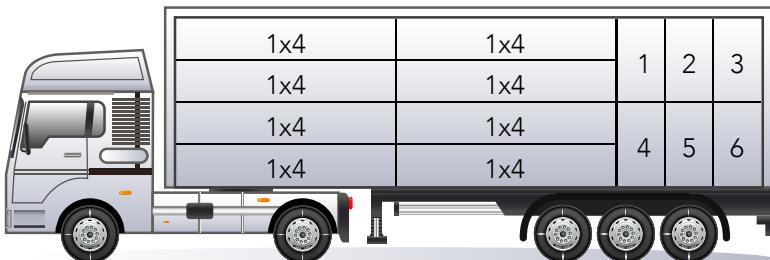

$$20 - 21,52 \text{ mm} = 10 + 10 (0,38 - 1,52) / 10,10 (1 - 4)$$

CODE	W	WEIGHT (kg)
9940.500.00	500	25
9940.600.00	600	30
9940.700.00	700	35
9940.800.00	800	40
9940.900.00	900	45
9940.1000.00	1000	50
9940.1100.00	1100	55
9940.1200.00	1200	60
9940.1300.00	1300	65
